

Section A:

Preamble

Our company is aware of the tremendous affect our projects have on the public. Our principles highlight what responsibilities we will hold onto to ensure to provide the most accurate and open information available to all.

Principles of Antivirus Co.

1. Have Accurate Medical Information

- a. Ensure information included is update date and will include accurate tools, information of illness, and procedures for illnesses.

2. Consider Public Opinions

- a. We will design our project in a way that allows for improvement and expansion

3. Open resource for students and schools

- a. Antivirus Co. will open projects that inform of medical issues to schools with a focus of medical practice. Our project will be open to low income schools as well low-income students

4. Developed and Tested

- a. Before making company projects available to the public, they will be tested by medical professionals to ensure that they are accurate and address issues. They will also be tested by professionals in technology to ensure that there are no issues in the software.
